

EAGLE 500 BI-LINEAR (C)
 Revised Schematic
 11/21/77

- *1 This resistor will vary from 120 ohm to 470 ohm.
 - *2 This resistor will vary from 100 ohm to 470 ohm.
 - *3 This Mod. Light was omitted in late model run's.
- NOTE: Early model 500's used only one transistor in the pre-amp.
 NOTE: Across Grid on all tubes there are .001 Silver Grid Mica Caps. Not shown on schematic.
