INSTRUCTIONS:

- Step 1.- Remove top and bottom covers. Remove screws holding speaker and bracket (Fig. A).
- Step 2.- Cut wire from FT2 to L-6.
- Step 3.- Install 7.8 crystal filter (supplied).
- Step 4.- Install can (supplied)
- Step 5.- Inject 27.205 (Ch.20) and adjust L-6 for maximum sensitivity. Inject at antenna.

NOTE: If no signal generator is available, tune L-6 for maximum noise. Use GC tuning tool #9440.
