

10 METER AMP BOARD MODIFICATION TO UPRIGHT DRIVER

Have you ever wanted to use a high-powered RF amplifier, but your rig didn't have enough output to drive it? Well, with a little time and very little expense, here's how to modify the Uniden 10 Meter Power Conversion from Secret CB, Volume 4, pages 68-70. This modification will convert it to an upright driver with 20-25 watts and gives your rig the extra power you need for driving the big ones.
