

MB8719/11.1125 XTAL CHASSIS

HOW TO GET BOTH HI AND LO FREQUENCIES W/O XTAL CHANGE

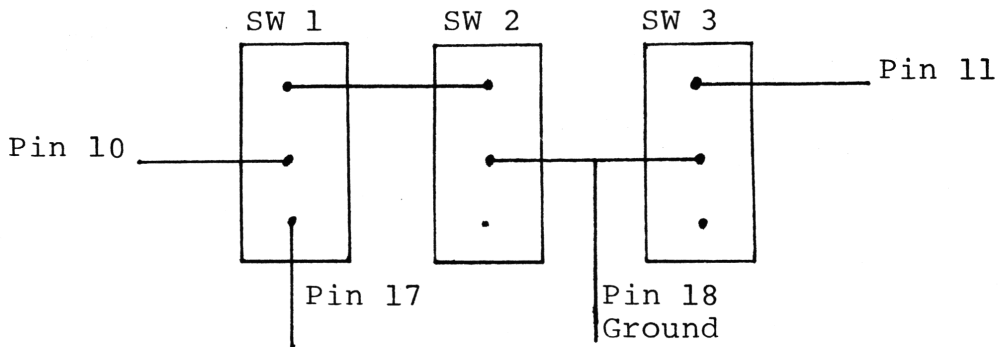

Parts Required:

1-SPDT switch.

2-SPST switches.

12 inches of four conductor ribbon wire.

Wire as shown below:

(Isolate Pin 10 if grounded)

SW1= 27.605-28.045

SW2= 26.325-26.765

SW3= 26.815-26.955

SW1+SW3= 27.455-27.725

Adjust L19 and L21 for maximum frequency coverage.

Reference: Volume 10, PP 25-31.

If you have trouble getting this mod to work, retune the tripler - VERY CRITICAL - (L18 on President Washington)

This mod looks like Bullshit to me (P)
This mod is Bullshit, Check Vol. 14 Pg. 11-12"
