

EXPORT ROUNDUP

THESE PAGES WILL BE UPDATED EVERY ISSUE - TO LET YOU KNOW WHAT IS REALLY OUT..

If you have ANY information (OWNER'S MANUALS, SCHEMATICS, FACTORY SERVICE MANUALS, FACTORY ALIGNMENTS) please send to Doris...ORIGINALS! Copies are no good, 80% of the time. Originals will be returned as soon as copied; have excellent facilities for doing this; and can then utilize the material. (I sent Doris the 148GTL-DX Early/Late versions; Factory Service Manual-corrected; in April '83 and they were returned within a week). This is the only way to compile information on these Export units, as most U.S. companies will not co-operate.

These tables will give you an idea of what is out there.

Also will show just what schematics/service data is available.

I can't see purchasing anything that doesn't have a schematic in with the Owner's Manual. Just throwing your money away...

If the 'underground distributor' can't provide a schematic and Service Manual/Lineup - let him eat the units, instead of you!

If you possess any Owner's Manuals, Service Manuals, Line-up Procedures, PLEASE send to Doris. It will be returned as soon as possible. NOTE: ORIGINAL NEEDED FOR THE SCHEMATIC!

I quit counting how many units there are when I hit the 100 mark!
