

# INTRODUCTION

We are in our 7th year of publishing SECRET CB. Many people have been involved with the gathering of information that has gone into the 19 volumes. Hope all of you have enjoyed this joint effort as much as we have.

We have covered a lot of the FM-DX units and there will definitely be more to come in SECRET CB Volume 20. Such as, complete factory line up info for the Jackson & Grant; whole pot full of modifications for the Jackson complete with hi-low power switch; more modification for Grant.

JOKE - EXPOSED! See page 69 for flyer that was sent to distributors with no return address/explanation! Got them all stirred up trying to find 'WILSON & TAFT'. "NO SUCH RADIOS EXIST, FAKE ARTWORK AND SPECS." I know for a fact; as he sent me a little 'DORIS'. (See below, think I will keep her). Reason for doing this was: Quote: "Stir up the distributors, who would stir up the manufacture/importer, who in turn would start building some top notch equipment!"

Hope to have a NEW PRODUCT RELEASE for volume 20.

Bill's phone number has gotten out and he doesn't appreciate calls at supper time, nor partial information over the phone. PLEASE WRITE!

Seems rumors have started that NEC has discontinued the 2SC1306 and 2SC1307. This is not so. They are still in production and we here at SECRET CB have plenty in stock.

Still no winner to our puzzle contest. Here is another hint: two words that fit in the down section - agent & cord. Now you have to find where they go.

Hope all of you are as pleased as we are with the fine job William G. Wentz, Jr. is doing as Editor of SECRET CB. THANKS BILL!!!!!!

Always sincerely yours,

*Doris*
