

ROGER "K"; ROGER - 5 Tone; ROGER CHEEP

These 'tone' modules are internally connected to your present transceiver. Can be used on any AM/FM/SSB unit; installation of module is simple; and directions are very well written/diagrammed.

Roger 'K' and Cheep have no adjustment. Roger - 5 Tone; has 7 adjustments: Output Level, Speed Control (controls the speed of tones), and individual adjustment of the 5 tones.

All units have the same installation/hook-up and do have a Disable/Kill wire for hooking up to a switch (not provided).

\* \* \* \* NO PROBLEMS should be encountered with this new module, as manufacturer went to great lengths to print very good installation and wiring diagrams. \* \* \* Available at Selman Enterprises.

**!!WARNING!!**

THE NEC 2SC1307 has been discontinued. There are some floating around with C1307 stamped on them, which we found to be 2SC1974. Held at a certain angle it could be seen. The 2SC1974 is rated 15W 2A and 2SC1307 is rated 25W 8A. The one we checked blew up. ECG-236 is direct replacement.
