

"Beef The Tube"
by W.H.

Most tube type units just don't have it in the audio department when it comes to output modulation swing in transmit.

By adding a few parts a vast improvement will be immediately noticed! **DO NOT REMOVE ANY ORIGINAL PARTS OR WIRING!**

Original schematic "cut-out" below is of the Gemtronics GTX-5000. Other similar type may be "modified" the same way.

ORIGINAL - UNMODIFIED, LAYOUT:

"MODIFICATION" - Added Parts are shown only with the tube pin #'s....
