Modifications are provided for information purposes only!

Supporters of CBTricks.com paid for the hosting so you would have this file.

CBTricks.com is a non-commercial personal website was created to help promote the exchange of service, modification, technically oriented information, and historical information aimed at the Citizens Band, GMRS (CB "A" Band), MURS, Amateur Radios and RF Amps.

CBTricks.com is not sponsored by or connected to any Retailer, Radio, Antenna Manufacturer or Amp Manufacturer, or affiliated with any site links shown in the links database. The use of product or company names on my web site is not endorsement of that product or company.

The site is supported with donations from users, friends and selling of the Site Supporters DVD's to cover some of the costs of having this website on the Internet instead of relying on banner ads, pop-up ads, commercial links, etc. Thus I do not accept advertising banners or pop-up/pop-under advertising or other marketing/sales links or gimmicks on my website.

ALL the money from donations is used for CBTricks.com I didn't do all the work to make money (I have a day job). This work was not done for someone else to make money also, for example the ebay CD sellers.

All Trademarks, Logos, and Brand Names are the property of their respective owners. This information is not provided by, or affiliated in any way with any radio or antenna Manufacturers.

Thank you for any support you can give.

Coil and Whip Ass'y

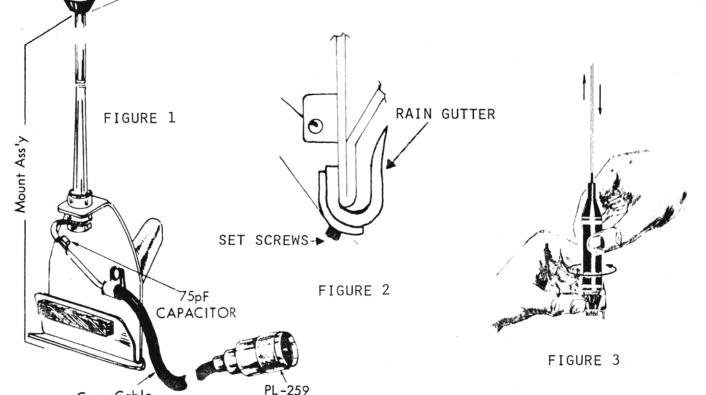

PACE P5646

GUTTER CLAMP CB MOBILE ANTENNA 25-30 MHz

The PACE P5646 Antenna is designed for Citizens Band (CB) or Business Band use in the 25-30~MHz range. The antenna will provide good reception for 27~MHz. Whip length may be adjusted for other frequencies.

INSTALLATION

- 1. Attach the clamp to the rain gutter as shown in Figure 2. Tighten the set screws through the paint to assure adequate grounding.
- 2. Run the lead wire through the window and connect to the transceiver's antenna jack.
- 3. For fine tuning, the whip may be moved up or down using a through-line RF wattmeter. Adjust the whip length for lowest VSWR. To loosen the whip, hold the ribbed base of the coil and turn the coil jacket counterclockwise ½ to ½ turn (see Figure 3). Retighten the whip by turning the coil jacket clockwise.
