

# MAGNUM Heatsink Comparison

The photo below shows the difference between the heatsink used on the 50W Magnum S Series radios (black heatsink in photo) and the new heatsink that is used on the 80W Magnum S Series radios (unfinished heatsink in photo). Please note that production 80W Magnum S Series radios will feature a black anodized heatsink, NOT an unfinished raw aluminum heatsink.

Measurements are provided on photo. The 50W heatsink weighs 3.76 ounces. The new 80W heatsink weighs 5.33 ounces.
